Rich Internet Applications
www.webspiders.com

**THE GLOBAL LEADER IN
RICH INTERNET & MOBILE
APPLICATIONS DEVELOPMENT**

What are Rich Internet Applications (RIA) and why is it important to my business ?

Rich Internet applications (RIA) are web applications that have the features and functionality of traditional desktop applications. RIAs typically provide a "no-refresh" look to the user interface and provide what is now being known as HDUX - High Definition User Experience. For an end user, RIA apps bring the best of client-server and web technology and for most ISVs and E-businesses, it's now imperative to adopt RIA technology for their next release.

Upgrade to Rich Internet Application (RIA) today! Ask Web Spiders

Web Spiders Provides

- RIA based development using SILVERLIGHT / FLEX / AJAX
- Systems Integration Services on commercial and open source content management (e.g. Ektron, Interwoven, Drupal) and Enterprise Blogging systems
- Rich Mobile Application Development for iPhone, Blackberry, Symbian and Windows Mobile
- Best-Shore Outsourced Product Development Services to Corporations and Technology Entrepreneurs

About Web Spiders

Web Spiders is a global outsourcing provider of Rich Internet Application (RIA) development services and Systems Integration services for Enterprise Content Management to Corporations and independent Software Vendors (ISV's) in more than 10 countries.

With its Offshore Delivery Centers in India and proximity centers in Europe and America, it bridges the offshore-on-site gap for its customers to achieve lower cost of ownership, reduce risk and accelerate "go-to-market" for their projects and products.

Web Spiders' services include Enterprise-scale Application Development on Silverlight, Flex and AJAX and Systems Integration services for 3rd party products in the areas of Web content & Document management (e.g. Ektron, Interwoven), Enterprise Blogging (WordPress, Movable Type) and Enterprise Wiki and Collaboration (e.g. MS SharePoint).

The company's quality processes are certified as per ISO 9001:2000 and is an Adobe, Interwoven, Microsoft and Ektron Gold Certified Partner. Its offices are spread across India, USA and UK. With a proven track record of maintaining confidentiality and IPR-protection and over 2000 person-years of experience, it has completed numerous engagements since 1997.

Why RIA ?

- Provides an end user experience similar to client/server applications supported by rich graphical user interface
- Delivers highly responsive performance and reduced network load
- Provides event-driven and stateful web applications
- Enables true services oriented architectures on RIA platforms like SILVERLIGHT / FLEX / AJAX
- Improves application usability and accelerates end-user adoption

What do we offer in RIA development

- Application Development and Maintenance on SILVERLIGHT / FLEX / AJAX with a choice of Backend Technologies e.g. .Net , Java , PHP
- Rich Mobile Apps development across all major platforms
- A Global Delivery model for faster go-to-market in a cost effective environment
- 100% protection of your Intellectual Property
- Rapid Team Scalability
- Outsourcing Services for the entire lifecycle - Design, Development, Testing Documentation and Support
